Chapter 3: DESIGN

This chapter describes about the design aspects of the project. As mentioned earlier this project uses HTML (/CSS) for designing forms that provide the user interface. Here are some of the forms designed and their functionalities:

- **Homepage:**

  Provides tabs like Registration form and Librarian Login.

- **Return Book :**

   This form is used to return the book that has been issued to the student.

- **Issue Book :**

  This form is used to issue a book to the student that has already in library database.

- **Add/Update student:**

  This form is used to add new student to become library member and update available student.

- **Add books:**

  This form is used to add a book to the library by category.
